

Colour can influence our emotions, appetite and concentration. Select colours that reflect the purpose of the room.

With the introduction of plantation shutters, external aluminum shutters and zipscreen blinds we have you completely covered inside and out.

Plantation shutters are available in cedar, painted finishes and faux timber. They can be completely customized to fit most shapes. All timbers used come from trees planted and grown specifically for the purpose of manufacturing shutters and blinds.

Zipscreen external shade blinds allow you to seamlessly integrate your indoor and outdoor entertaining areas.

By enclosing your alfresco entertaining areas, outdoor patio blinds protect you from the elements - be they rain, wind or sun - and ensure privacy and complete comfort.

At Peninsula Curtains and Blinds we continually source new products and offer the latest design trends and innovative ideas. Our diverse product range also includes roller blinds, screen blinds, curtains, roman blinds, panel blinds, timber venetians, pleated blinds, verticals, canvas and shade cloth awnings, plantation shutters, external aluminium shutters, pvc/cafe blinds, austrian blinds, swags and tails, bedspreads and accessories.

Colour plays a very important role in everyday life. It can greatly influence our emotions, appetite and concentration levels. Using the colour chart below may help you discover which colours are suitable for certain areas of your home.

Energy Desire Courage	Enthusiasm Creativity Happiness	Intellect Cheerful Uplifting	Relaxing Calming Healing	Peaceful Confidence Intelligence
Passion Romantic Ambition	Friendliness Health Warm	Safety Perfection Purity	Cool Conservative Sophisticated	Power Elegance Formality

Peninsula Curtains and Blinds is a family owned and operated company. Established in Mornington for over 28 years we manufacture curtains, blinds, and all soft furnishings in our own workshop.

We have a fully staffed display centre and showroom where our experienced decorators advise and assist you throughout the selection process. Whether it's one window, a whole house or even a school or nursing home we are dedicated to helping you from your initial consultation right through to the installation. Our mobile showrooms exhibit the full range of curtains and blinds with operational samples that our decorators are happy to demonstrate. We invite you to visit our showroom at 51 Yuilles Road, Mornington, or call us for an in-home or on-site free measure and quote.

Distinction and style....

Peninsula Curtains & Blinds, proudly unrivalled in service and quality.

Folding arm awnings retract into a streamline head box and are virtually invisible when not in use. When in use they create a shaded area so you can still take pleasure in the outdoors without being exposed to the sun and harmful UV rays. Generally automated and installed with an intelligent sun and wind sensor these awnings retract if the wind increases to a level where it may be damaged, and when the wind diminishes the awning extends out again.

Automation is a popular way of operating your new curtains and blinds. You can program multiple window coverings to move independently or as a group. You can also program them with the remote control to open and close at specific times during the day, or for complete intelligent blind control, you can have a sun sensor fitted allowing your curtains and blinds to operate when the glass reaches a certain temperature. In today's demanding environment it's reassuring to know your window coverings can 'think' for themselves.

We recently added wire-guide rollers to our range of internal roller blinds and the aptly named 'big blind.' Windows are consistently getting larger in homes and workplaces and we now have a range of wide width fabrics and a roller blind system that allows us to make a single blind up to 4.4 meters wide! Further advancement is linked blinds where you may have multiple blinds linked to the one operating chain. For those wider expanses of glass you can cover up to 13.2 meters on one single chain. Alternatively you can automate 'big blinds' and linked blinds. The roller blind range of fabrics consists of sunscreen, translucent, blackout, sheer, printed and textured.

All our work is fitted by our own professional installers and all work is guaranteed.

Energy efficiency is a confronting issue we face every day. There are many ways to make a difference and at Peninsula Curtains and Blinds we are committed to helping you reduce your carbon footprint.

External shading such as exterior roller blinds and awnings can block up to 85% of summer heat gain through windows.

Internal window coverings such as heavy lined drapes with a pelmet can reduce winter heat loss by as much as 63%.

Not only will you decrease your energy consumption, you will significantly reduce the costs of heating and cooling your home.

Reduce up to 85% of heat gain from entering your home.
